<b>INTRODUCTION</b> .....	<b>10</b>
Parts of a Llama	
<b>1. BUYING A LLAMA OR ALPACA</b> .....	<b>13</b>
Purpose of the animal·Sex·Age·Personal preference·Researching farms and animals·Buyer's exam of the llama·Warranties and contracts·Veterinary pre-purchase exam	
<b>2. CONCERNS OF TRAVELING</b> .....	<b>19</b>
State health requirements·Vehicles for transportation	
<b>3. RESTRAINT</b> .....	<b>23</b>
Babies·Halters·Knots·Cross tying·Chutes	
<b>4. NUTRITION</b> .....	<b>33</b>
Water·Energy·Protein·Minerals·Vitamins·Guidelines for feeding·Determining ideal llama or alpaca condition	
<b>5. HERD HEALTH</b> .....	<b>41</b>
Records·Nutrition·Parasite control·Immunization programs·General disease control and prevention	
<b>6. TEETH</b> .....	<b>53</b>
Normal dentition·Fighting teeth and their removal·Tooth infection·Missing teeth	
<b>7. EYES</b> .....	<b>57</b>
Normal eyes·General signs of eye problems·Eyelid injuries·Conjunctival injuries and infections·Eyeball injuries and ulcers·Behavioral eyelid oddities·Troubleshooting eye problems chart	
<b>8. WOUNDS</b> .....	<b>63</b>
Open wound care·Puncture wounds·Abrasions·Bruises·Burns·Troubleshooting Chart	
<b>9. LUMPS AND BUMPS</b> .....	<b>69</b>
Normal bumps·Scar tissue·Swelling·Allergies·Tumors·Abscesses	
<b>10. SKIN DISORDERS</b> .....	<b>73</b>
Hair loss·Mange·Lice·Allergies·Zinc responsive skin disease	
<b>11. LAMENESS</b> .....	<b>75</b>
Normal anatomy·Toenail trimming·Pads·Joint and leg problems·Fractures	

<b>12. HEAT AND COLD PROBLEMS .....</b>	<b>85</b>
Hyperthermia·Hypothermia	
<b>13. RESPIRATORY PROBLEMS .....</b>	<b>89</b>
Normal respiration·Upper airway infections·Upper airway irritation and allergies·Sinus·Pneumonia·General advice for llamas with signs of respiratory illness·Choanal atresia·Ventilation	
<b>14. DIGESTIVE PROBLEMS .....</b>	<b>91</b>
Normal digestion·Salivation·Diarrhea·Constipation and impaction	
<b>15. THE DOWN LLAMA OR ALPACA .....</b>	<b>95</b>
Normal behavior·Colic·Injury·Paralysis·Transporting the “down” llama and alpaca·Troubleshooting chart	
<b>16. REPRODUCTION.....</b>	<b>99</b>
Male: Normal anatomy·Normal breeding behavior·Female: Normal anatomy·Puberty·Choosing a mate·Methods of breeding·Normal breeding·Pregnancy diagnosis·Infertility and abortion·Stages of normal parturition·Newborns·Dystocia·Troubleshooting dystocias	
<b>17. NEWBORN LLAMAS AND ALPACAS.....</b>	<b>119</b>
Breathing·Umbilicus·Temperature and weight·Standing·Nursing·Premature baby·Urination and defecation·Crooked legs and floppy ears·Normal behavior·Troubleshooting chart	
<b>18. MASTITIS .....</b>	<b>123</b>
Subclinical·Subacute·Acute·Peracute·Diagnosis·Treatment·Prevention	
<b>19. THE AGING LLAMA OR ALPACA .....</b>	<b>127</b>
Musculoskeletal changes·Temperature extremes·Vision and hearing·Digestion and nutrition·Immunity·General organ dysfunction	
<b>20. HOW TO GIVE INJECTIONS .....</b>	<b>131</b>
General rules·Intramuscular injections·Subcutaneous injections·Collecting blood sample	
<b>21. PASSING A STOMACH TUBE .....</b>	<b>139</b>
Indications and cautions·Baby llamas·Adult llamas·Correct placement	
<b>22. TAKING A TEMPERATURE .....</b>	<b>145</b>
<b>23. APPENDIX.....</b>	<b>147</b>
Normal values in llamas and alpacas·Measurement equivalents·Supplies·Restraint chutes·Congenital defects·Poisonous plants·Fiber and Shearing·Feed Analysis	
<b>INDEX .....</b>	<b>168</b>

# ILLUSTRATIONS

---

- Parts of a Llama, 9
- 1.1 Leg conformation; Sickie hocked; Cow hocked, 14
- 1.2 Ankles, 15
- 3.1 Proper fit of halter, 24
- 3.2 Square knot, 25
- 3.3 Bowline, 26
- 3.4 Quick release, 27
- 3.5 Clove hitch, 27
- 3.6 Lark's head, 28
- 3.7 Cross tie, 28
- 3.8 Chute, 30
- 3.9 Chute, 31
- 3.10 Llama in stanchion, 32
- 4.1 Llama condition- thighs, 38
- 4.2 Llama condition- chest, 38
- 4.3 Llama condition- back, 39
- 6.1 Normal teeth, 53
- 6.2 Fighting teeth removal, 55
- 6.3 Tooth root abscess, 56
- 7.1 Normal eye, 57
- 7.2 Abnormal eye, 58
- 7.3 Flushing out the eye, 59
- 7.4 Non-cosmetic results of uncorrected eyelid injury, 59
- 7.5 Applying eye ointment, 60
- 8.1 Bandaging, 64
- 11.1 Normal feet, 75
- 11.2 Normal pad, 75
- 11.3 Long toenails, 75
- 11.4 Toenail trimming without artificial aid, 76
- 11.5 Picking up feet for toenail trimming (4 diagrams), 77,78,79
- 11.6 Trimming toenails, 80,81
- 11.7 Dropped ankles, 82
- 14.1 Stance of an ill llama, 94
- 16.1 Normal male external genitalia, 99
- 16.2 Normal breeding position, 100
- 16.3 Normal female external genitalia, 105
- 16.4 Enlarging teats with impending parturition, 110
- 16.5 Normal Parturition, 111,112,113
- 16.6 Direction of joint flexation, 115
- 18.1 Mastitis, 123
- 19.1 Older llama over at the knee, 128
- 19.2 Older llama unable pr unwilling to raise neck, 130
- 20.1 Parts of a syringe and needle, 131
- 20.2 Filling a syringe, 132, 133
- 20.3 Sites of IM and SQ injections, 134
- 20.4 Giving an IM injection, 135
- 20.5 Giving an SQ injection, 136
- 20.6 Collecting blood sample from tail vein, 137
- 21.1 Passing stomach tube on a baby llama, 140
- 21.2 Measuring length of stomach tube, 141
- 21.3 Passing stomach tube on adult llama, 142
- 21.4 Feeling for correct placement of tube, 143
- 21.5 Administering medicine via stomach tube, 144
- 22.1 Taking a rectal temperature, 146
